FOUR SEASONS BODY

STEEL | STAINLESS STEEL COMBO

NEED EQUIPMENT?

TWIN.CA

The four seasons body combined all functions of a conventional dump body and of an abrasive spreader. With this type of body, it is possible to make the conversion from dump body to spreader (or from spreader to dump body), in just a few minutes.

Standard features :

- Driver-side integrated conveyor in floor of body;
- Floor and passenger side inner wall raised to feed conveyor when required;
- Ready to perform several duties with no down time;
- Spinner location assures traction to rear wheels;
- Conveyor can be used for other functions than abrasives spreading i.e: shoulder work, pothole patching;
- Rectangular body profile to maximize payload.
- Capacity of 2.7 to 14 Vc and dimension of 8 'to 16' built HD.
- Corten steels are used against rust.
- Hardox steels are also used to compensate for more rigorous use for example :excavation.

Available Options:

- Removable screens;
- Barn door tailgate;
- Coal doors;
- Sliding ladder;
- Removable spreader apron;
- Summer chute;
- Hydraulic material discharge gate;
- Heated floor;
- Spreading reversed;
- Uploading transverse conveyor;
- Adjustment of automatic conveyor chain;
- Extra light holes;
- Central lubrication to extend the life of moving parts;
- More ...

Hardware : Hardox steel, Corten steel or stainless steel option.

**This type of body may be installed on 1 ½ tons, single axle 37000 GVW, tandem trucks as well as on 4 x 4, 6 x 6, (etc.) vehicles.*
